

Bl  
AX  
said book, a web address of a copy tracker for said book, an identity of said order, a first number of copies of said entire book that are permitted to be made, a second number of copies of pages of said book that are permitted to be made and a third number of copies of pictures of said book that are permitted to be made; and

(b) notifying a copy tracker that said record has been provided on said book.

2. (Amended) The method of claim 1, wherein said record includes at least said web address, and wherein said label is provided on a cover of said book.

3. (Amended) The method of claim 1, wherein at least a portion of said record is provided on said label in machine readable form.

4. (Amended) The method of claim 2, wherein said at least one portion of said record includes at least one member of the group consisting of: said web address and said identity.

5. (Amended) The method of claim 1, wherein said record includes at least said web address, and wherein said label is provided on one or more pages of said book.

6. (Amended) A transaction processor for filling an order for a right to make copies of a book comprising:

a processing unit and a memory; and

an order procedure stored in said memory, wherein said order procedure includes:

Bl  
Ax

first means for controlling said processing unit to provide a label containing a record of said order, wherein said record includes a plurality of members of the group consisting of: a title of said book, a web address of a copy tracker for said book, an identity of said order, a first number of copies of said entire book that are permitted to be made, a second number of copies of pages of said book that are permitted to be made and a third number of copies of pictures of said book that are permitted to be made, and

second means for controlling said processing unit to notify a copy tracker when said label has been provided on said book.

7. (Amended) The transaction processor of claim 6, wherein said order procedure controls said processing unit to provide said web address and said identity of said order on said label, and wherein said label is provided on a cover of said book.

8. (Amended) The transaction processor of claim 7, wherein said web address is in machine readable form.

10. (Amended) The transaction processor of claim 6, wherein said record includes at least said web address and said identity, and wherein said label is provided on one or more pages of said book.

11. (Amended) A memory medium for a computer that fills an order for a right to make copies of a book, said memory medium comprising:

first means for controlling said computer to provide a label containing a record of said order, wherein said record comprises a plurality of members of the group consisting of: a title of said book, a web address of a copy tracker for said book, an identity of said order, a first number of copies of said entire book that

are permitted to be made, a second number of copies of pages of said book that are permitted to be made and a third number of copies of pictures of said book that are permitted to be made; and

second means for controlling said processor to notify a copy tracker when said label has been provided on said book.

12. (Amended) The memory medium of claim 11, wherein said order procedure controls said processing unit to provide said web address and said identity on said label, and wherein said label is disposed on a cover of said book.

13. (Amended) The memory medium of claim 12, wherein said label is also provided on one or more pages of said book.

14. (Amended) A method of making a copy of one or more pages of a book comprising:

(a) reading a record disposed on said book, wherein said record includes a web address of a copy tracker for said copies of said book;

(b) using said web address to send to said copy tracker a request to make said copy, said request including an identity of a right to make said copies and an identification of said pages;

(c) obtaining from said copy tracker an electronic image of said pages;  
and

(d) making a human readable image of said electronic image.
